BIOLOGY RESEARCH STUDY

Assignment: You will use Prezi, an online program to make a 5 minute presentation that informs us about these unusual insects: **Stick Insects**.

Science learning: for "uphill"

- -shows understanding of Biological classication system (Kingdom -> species)
- -shows natural observation skills through biological drawings (accuracy; realistic in form, colour, magnification/scale, labels)
- -engages in secondary scientific research: Prezi shows <u>References</u> (At least 1 book; every website must show Website title/author/URL/date accessed)

Technical Learnings

- First and last frame must show the whole prezi
- your biological drawing
- Min. 1 digital image
- 1 video

Oral Presentation Learnings (Social Studies)

- Publicly presents with a classmate on the Smartboard
- Speaks clearly for ½ the presentation (partner)
- Competently answers 1 question from audience

Subtopics your prezi might contain:

- Appearance
- Classification (show how related to other insects)
- Diversity (how many different species of this "type" of insect are there?)
- Life History (How they Live)
- Reproduction (How they reproduce? Lay eggs? Mate?)
- How to care for as a 'pet"
- Uses by humans / Dangers to humans (Are they 'pests'? How?)
- Interesting Facts

Mountain	Uphill	Straight Ahead
6 subtopics Transitions smooth and logical Showcases the information (not the prezi itself)	All learnings (Science, technical, presentation) are strong 4 subtopics	Something missing
Presentation more than 3 min but NOT more than 5 min.	Presentation 5 min. with partner	Prezi incomplete or pathway wrong; or presentation lacks
	References: minimum 3 sites, 1 book	Audience skills inappropriate
